

The Honorable Rick Snyder
Lansing, MI 48909

Dear Governor Snyder,

As a supporter of early childhood development and educational programs in Michigan, I urge you **NOT** to make additional cuts to these resources when working on the Michigan budget crisis. Education is **NOT** a place to make cuts in order to solve the financial issues of our state. In fact, continued support to ALL educational programs is critical to the repair and future success of our state. Educational funding should be a first priority in the budget as education is what all children need in order to be ready for school and life! Decreasing funds in early education and K-12 funding is putting our children at a significant disadvantage and forces them to struggle for success early on and throughout their lifetime. Please keep our state's children in the forefront of your budgetary planning.

Sincerely,
